VIRGINIA ASSOCIATION OF CHIEFS OF POLICE

Proposed Model Alarm Management Policy

WHEREAS, the Virginia Association of Chiefs of Police (VACP) recognizes that homeland security and community oriented policing continue to put new demands on law enforcement resources, and;

WHEREAS, results from studies initiated by law enforcement and the alarm industry indicate that enacting effective alarm ordinances significantly reduces false dispatches, thereby freeing up law enforcement resources that can be redirected to homeland security, community oriented policing, and crime reduction.

THEREFORE BE IT RESOLVED, that the Virginia Association of Chiefs of Police urges all law enforcement and public safety agencies to utilize the VACP Model Alarm Management Policy in developing and / or revising their current Alarm Ordinance and Alarm Management Program.

PASSED AND ADOPTED this 8th day of August, 2009 by the Executive Board of the Virginia Association of Chiefs of Police.
